"OUR OBLIGATIONS" WAS SUBJECT OF SPEECH WILLIAM G. BLAKE BEFORE LOCAL ROTARIANS

An address "Our Obligations" was made by Secretary W. G. Blake of the Rotary Club, at the last weekly meeting of that organization, in the Nueces hotel, Thursday noon. Mr. Blake said: "Brother Rotarians: In accepting membership in the Rotary Club you do so with the knowledge that it is not a secret organization, nor that you are bound to do it with an oath of allegiance. Its meetings are open to visitors, its activities are broad and public, but still there is a distinct feeling that in accepting such membership, you obligate yourself to offer something in return for the honor of having been accepted to represent a certain branch of this city."

"Limited, as it is, in its membership, in that there shall be no duplication of classification, the Rotary Club is founded upon a most solid rock. Its members are all considered the representative ones in their various lines of occupation; its affairs are conducted in a businesslike manner, and each member's voice is on an equality with the others."

"Now what is that obligation which we take upon ourselves? Of what is our first thought in Rotary? If we are inundated with the true Rotarian spirit, it is in service; service, not self-service to our club and service to our fellow man. Let us forget self for the present and let us serve others."

"Our business is all founded on service, let us throw our whole heart into this service, deal fairly, establish honest methods, and high ethical standards, and one for a moment could not doubt success. Service breeds acquaintance, friendship, out of which springs greater things. Service, Rotarians, service, naturally aids one in business, because Rotarian service means a greater service than that given by competition."

"Another service the man of today should not overlook is the service to our younger brother--save a smile, a kind word for the schoolboy, the newsboy, the shoe shiner, the young man just entering business life; it is encouraging, and will do good."

"I have a kindly feeling for the American newsboy, and when within my power, I delight in doing them a service; no matter how slight. Now, your service in Rotary? you have not been elected to ornament this organization, not to honor it, quite the contrary. It is a privilege to be one of them, the club has shown its confidence, and its good will towards you. Deserve that confidence, and good will by service. Be of that body which, when a good proposition is placed before you for action, approves of it, and says let us get busy, not of that which says, but, but, but. Put service in Rotary and get something out of it."

"If you are placed on a committee, serve it to the best of your ability; if you are on the program, serve; if only to whistle, serve, act, for if you start, you will arrive, if you don't, you won't."

"Let us make this club a club of six cylinders, well starting, primed for action, organization, and become a power. However, do not understand me to mean that good wholesome fun, which is so conducive to the good fellowship and joy of the meeting, should be excluded, on the contrary, mix it with business, create the laughter, which tends to loosen the heart strings, and much of the boys' own work."

"To remember the obligation which Rotarianship has been impressed upon you, that the who profits most serves best, and give that service to your fellow man and The Rotary Club, which is given with your whole heart with the best of your ability."

PRIZES FOR BEST YIELDS GRAIN CROPS WILL BE OFFERED BY INDUSTRIAL CONGRESS

TEXAS ORGANIZATION THAT IS DEVOTED TO THE AGRICULTURAL DEVELOPMENT OF TEXAS WILL OFFER CASH PRIZES TO BOYS AND GIRLS MAKING BEST YIELDS OF GRAIN.

DALLAS, Texas, Sept. 19. To encourage the movement for a reduction of next year's cotton acreage, and for the information of the farmers of the state in order that they may prepare their land now, the Texas Industrial Congress announces its intention to offer prizes next year for the best yields of cotton, wheat, corn, sorghum, and other crops, and for the best yields of production considered, on not less than five acres cultivated in wheat, corn, sorghum and perhaps rice.

Because of their value for winter pasture and in preventing surface washing, and also because of their low cost of cultivation as compared with cotton, these grains are usually as profitable as cotton in ordinary times, and are certain to be more profitable than an overproduction of cotton, in view of the European war situation. South grains afford an admirable substitute for cotton on much of the land cultivated in cotton this year, and which if the acreage is at all reduced, might not otherwise be utilized. The European war assures splendid prices for feedstuffs of all kinds, and the farmer who plants winter wheat and of other small grains this fall can count upon getting good prices, such as have not been realized for a number of years.

The abundant recent rains have insured enough moisture in the ground to start the prompt growth of all grain crops, and there can be no better possible preparation of the soil for them than the cultivation which the land has received in growing this year's cotton crop. Grain does best when sown upon a firm seed bed that has been deeply prepared sufficiently in advance of the sowing to have become firmly settled. This is just the condition in which the cultivation of cotton has left the ground. The farmer may reasonably expect, therefore, a good yield of wheat, oats, or sorghum planted now in the middle between the cotton. This can be done with any of the drills made especially for that purpose, or by running a mold-board through the middle, making about four furrows, sowing the seed in these furrows and then covering them with a harrow, or the seed may be sown broadcast and then covered with a harrow. Where this method is used not less than two bushels of oats and one-half bushel less of wheat should be sown; if the drill is used about one-half these quantities is sufficient.

Great care should be taken in selecting wheat, oats and barley for seed, and, if possible, seed raised in the community, which has been tested for several years, should be sown. The use of much fertilizer when planting fall grains is not advisable, but if the soil has previously been fertilized with stable manure, nothing can be better. Stable manure applied fresh, however, at the time the grain is sown is apt to do more harm than good by pushing the grain forward too rapidly and developing a tendency to lodge next spring. In the spring, if the grain does not start promptly, a top dressing of from 200 to 400 pounds of fertilizer composed of equal parts of cottonseed meal and acid phosphate will be helpful.

A general planting of grain crops this fall not only insures good crops and high prices next year, but also promises an abundance of cheap feed for livestock, and guarantees that the livestock now on the farms will be in the best possible condition next spring for sale when the demand will be greatest. This adds no additional cost; for care-

600 CARS IN SIX DAYS WAS RECORD FOR HUDSON COMPANY

For Week Ending September 5 Hudson Company Shipped Exactly 600 1915 Model Hudsons.

During the week ending September fifth the Hudson Motor Car Company built and shipped exactly six hundred cars. This was an average of just one hundred per day for the six working days.

None of the men worked overtime. There was no rush, and no attempt at making a record. It was just the normal, regular output.

The record for August, which was over seventeen hundred cars, promises to be smashed in September. The factory plans to ship from twenty-seven hundred to three thousand cars before October first.

This tremendous output is necessitated by the flood of orders which has poured into the factory in an unceasing stream since the 1915 model was announced two months ago. And still there are thousands of unfilled orders in dealers' hands.

Charles, the local Hudson distributor, characterized this as a most optimistic sign of the confidence of the American public in the stability of prosperity. There seems no disposition on the part of any buyers to become panic-stricken over war conditions. Times move along as serenely as though the entire world was at peace. This feeling of security grows more marked day by day.

That the motor car is a good harbinger of business conditions is unquestioned. That the Hudson can report such a firm time to the market is most reassuring.

VALLEY GRAVITY IRRIGATION DIRECTORS PLAN FOR ACTION

FIRST MEETING OF BOARD OF DIRECTORS HELD AT MISSION AND OFFICERS NAMED.

MISSION, Texas, Sept. 19. The first meeting of the board of directors of the Valley Gravity Irrigation Association of the Lower Rio Grande Valley was held last night. This organization was perfected in this city on Sept. 9 to promote the development of the Rio Grande river for a survey of the Rio Grande river from its mouth to Fort Quitman for the purpose of devising some means by which the storm and flood waters of the Rio Grande could be utilized to the best advantage, as well as to promote the irrigation of the Lower Rio Grande Valley by gravity under Federal control as well as the negotiations of a treaty with Mexico providing dams and reservoirs for the storing of these waters.

The attendance represented practically every section of the Valley and the meeting got down to earnest business immediately. A permanent organization of the board was perfected in the election of Geo. P. Bowen as president of the board of directors with Col. D. P. Gay of El Paso as first vice president and Prof. D. A. Kent of El Paso as second vice president, together with S. A. Pipes as secretary.

In order that the business of the organization may proceed with every dispatch, an executive committee was appointed, being E. A. Storing, Monte Cristo, Col. D. P. Gay of El Paso and

Think of the Company behind the car--and you'll realize why Fords and Government bonds are bought with equal assurance. Strongest financially--world-wide in scope--largest in volume of output. We build our reputation into the car and guarantee service afterwards.

Have you ever witnessed the dilapidated and neglected appearance of the average Cemetery NOT UNDER PERPETUAL CARE?

Contrast such a condition with the permanence and perpetuity of

Rose Hill Cemetery

This cemetery is established under CHARTER FROM THE STATE OF TEXAS. Cemeteries without perpetual care CAN and DO go to rack and ruin. Rose Hill Cemetery is so organized that, if the present Manager and Directors were to pass completely out of existence, its care and maintenance would be conducted just the same.

We want to show you ROSE HILL. We want you to compare its beauties of landscape architecture with other Cemeteries that you have seen. We want you to realize its advantages over other Cemeteries.

Won't you call us up and let us arrange to take you out and see the beautiful grounds? You will be under no obligation whatever to buy.

Those not prepared to pay for a lot in full at time of purchase will be accommodated with convenient terms.

**We make removals from nearby Cemeteries free
of expense to purchasers of lots in ROSE HILL.**

Our Phone Number Is 380--Call Us Up NOW
